ASTA12LFC

## Super Efficient - 6 STARS

Outright winner of the "Most Efficient Heatpump/Air Conditioner" for 2009/2010. Saves on power, which helps save our environment and your pocket.

### Apple-Catechin Filter

Fine dust, invisible mould spores, and harmful micro organisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polypenol ingredient extracted from apples.

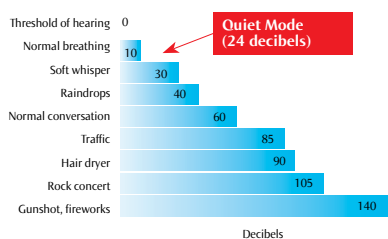

### Long-life\* Ion Deodorisation Filter

The filter deodorises by powerfully decomposing absorbed odours using the oxidizing filter and reducing effects of ions generated by the ultra-fine-particle ceramic. (\*The filter can be used for approximately 3 years if it is washed under water to restore its surface action when it is dirty.)

## Quiet Operation

Fujitsu engineering, smart fan technology and quiet mode ensures whisper quiet operation, from just 24 decibels.

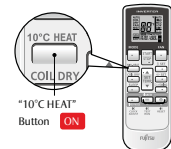

## Effortless Performance, For A Cost Efficient Room

Fujitsu's inverter technology coupled with high capacity and compact DC engineering can handle greater temperature extremes than conventional heat pumps, making them more economical and able to reach the desired temperature faster.

COOLING	HEATING
-10°C to 46°C	-15°C to 24°C

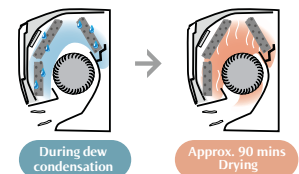

## 10°C Heat Operation

The room temperature can be permanently set to go no lower than 10°C, so that the room will never get too cold when not occupied. Ideal to stop pipes freezing in holiday homes over Winter.

## Inner Drying Operation

Prevents the growth of mould and bacteria on the indoor heat exchanger, therefore providing a cleaner, healthier environment.

## 7 Day Programmable Timer - Wall Controller (Option)

Wall controller can be fitted and switch the unit off and on twice a day. Also built into the controller, a 7 day programmable timer. So you can set and forget.

- Weekly timer (2 x start and 2 x stop settings per day)
- Temperature set back timer enabling different night and daytime temperatures
- Various timer set-up
- Memory back up setting
- Child lock
- Filter maintenance display
